

Application:

Fully automatic snow melt circuit isolated from boiler/heat source circuit through the use of a heat exchanger
(one low temp. circuit - fully automatic modulating water temperature for snow melting c/w snow/ice detector and in-slab sensor)

(one high temp. circuit off boiler/heat source primary loop for snow melt heat exchanger)

Note:

- Drawings are for HeatLink® suggested electrical schematics only! User must determine if electrical schematic will work for their particular application. User must also confirm all HeatLink® schematics with manufacturer schematics of each particular control chosen.
- In all cases manufacturer equipment schematics will take precedence over HeatLink® electrical schematics.
- All wiring as per applicable electrical codes!
