Cold Water
Supply

Boiler

P1

TMP Series
For all these models, primary piping with
circulator must have no pressure
differential between panel primary supply
and return, i.e. close tees.

Heat Link®
TMP040/070
Panel

Thermostats

Recommended
Pressure Bypass
Valve

Recommended
Sidestream Filter

Radiant Heating
Manifold

Notes:
- Drawings are for HeatLink suggested system layout only! User must determine if system layout will work for their particular application.
- Air vents, expansion tanks, pressure relief valves, etc. for heat source as per local codes.
- Use isolation ball valves for all circuits and components.
- Local codes, regulations, and authorities have final jurisdiction.

Heat Source: Boiler
Panel(s): TMP Series
Heat Load(s): Radiant Heating – Multiple Zones
