Description

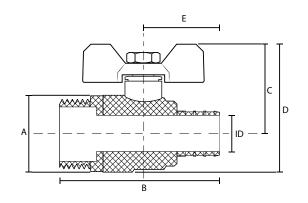

No lead brass ³/₄" PEX F1807 × ³/₄" MNPT full port straight ball valves with butterfly handle.

The use of PEX tubing in a potable hot-water plumbing system with an operating temperature above 140°F (60° C) or system pressure above 80 psig (550 kPaG) or highly aggressive water quality or any combination thereof can significantly reduce the service life of the tubing.

HeatLink requires following the guidelines described in Plastics Pipe Institute TN-53, Guide to Chlorine Resistance Ratings of PEX Pipes and Tubing for Potable Water Applications and HeatLink INFO 37, Domestic Hot Water Recirculation Systems.
