Description

The Door / Window Sensor is a simple device that connects wirelessly with the Gateway as part of the Smart System.

The sensor sits across both sides of the opening of a door or window and when the contact is closed or opened, a signal is sent wirelessly to the Gateway. User programmed rules easily created in the Smart System app then define what should be done in response and the Gateway wirelessly controls the appropriate device.

By detecting when doors and windows have been opened or closed, smart rules can be triggered to control other devices to save energy, improve efficiency, security or convenience.

Features & benefits:

- Improve home security by monitoring door/window access from anywhere using a Smartphone, Tablet, or PC via the app.
- Optimize heating/cooling efficiency by controlling your thermostats to react when doors or windows are opened.
- Program your system to remind you if doors or windows are left open when you leave the home.
- Anti-tamper switch will notify you of tampering.

Includes 1× CR3032 3V Lithium battery and mounting kit.

Qty	Stk. #	Weight
	43303	0.11 lb (0.05 kg)

Technical Data

	Specifications
Controls	Tamper button Magnet sensor
Indicators	Status LED
Mounting	Screw or adhesive
Operating Conditions	32 – 104°F (0 – 40°C) 20 – 90% RH, non condensing
Storage Conditions	-4 – 185°F (-20 – 85°C) 20 – 90% RH, non condensing
Radio	802.15.4 (2.45 GHz) ZigBee HA 1.2 based protocol
Battery	3V Lithium CR3032
Max. Gap	1" (25 mm)

Standards / Listings

FCC ID: 2AAUQ-CTL35XXA

IC: 1700D-CTL35XXA

Dimensions

Installation

Installation must follow all of HeatLink's instructions and guidelines.

Maintenance

Maintenance must follow all of HeatLink's instructions and guidelines.
